Optional question: Please provide additional comments below. What could we improve upon? Did we do anything exceptionally well? What can we do to improve A&O for future participants?

No need to repeat non-essential information that can EASILY be found online
good

Maybe the group can show students around the campus and introduce not just the campus but the whole city for international student which can help them get a better understanding about their upcoming campus life.

the first day orientation is too long

no it's all great

none

Too long and too much time for A&O

The schedule is bit confusing due to some small mistakes

I think the OL's in general were all good and understanding towards the students. In the future I think some of the information should be presented in a format that is more understandable and engaging for people who aren't very fluent in English. Some of the information was presented quite fast due to time restrictions and I feel that some of the students definitely could not keep up with the slides at times.

KEEP ON GOING EVERYTHING IS GOOD

You did perfect jobs for our first year students.

Please separate the orientation events with EFS courses. The second day we arrived in Seattle is Orientation day and because of Jet leg, I didn't take well rest but the third day is the first class, which made me exhausted.

The food could be improved, hot food would be better.

Decrease the whole duration.

doing just fine

Provide better food``

Maybe schedule the second day program later so we don't have to rush through lunch

No, every OL are good
